Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. The firm, the claim forms and the counts are invented; no real person is named. The circumstances box **determines the circumstance retained, and therefore the scale.** It is the most critical field on the document.

What is captured, box by box

Status returned	Boxes	What the referent must do
Ticked	**1,411**	Nothing
Not ticked	**2,132**	Nothing
Two candidates set side by side	**27**	**One click on the right box**

3,570 boxes across 210 forms. 191 forms come back box by box with nothing to settle; 19 put a question.

The difficulties of a ballpoint on a carbon pad, and how they are resolved

Difficulty	What resolves it
The cross spills into the box below	The centre of gravity of the stroke and the ink density per box
The back prints through onto the front	**The mark from the back is paler and lacks the pressure of the front**
A cross struck out, redrawn three lines down	**The strike-out is read as a strike-out**, not as a ticked box
Two handwritings on one pad	Separation of the two driver columns

The threshold dial, and what it gives on both sides

Setting	Boxes settled alone	Set before the referent
Current threshold	**3,543**	**27**
Threshold raised one notch	3,557	13

> **The dial belongs to the firm**: it moves in one line of configuration, and the count for both settings is provided before the decision. **On this field, an ambiguous cross is not settled without the referent until the referent asks for it.**

The sketch

Returned on screen, straightened and enlarged, next to the boxes. **Under mandate, it is converted into circumstances** — vehicle positions, direction of travel, point of impact — **and set systematically against the ticked boxes. Across the 210 forms, the drawing and the boxes diverge 6 times**: those six are worth a look before the file is opened.
