Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. The firm, the claim forms and the counts are invented; no real person is named. **No file is opened or merged by the agent.** Duplicates are shown before opening.

The two cases, and why they are not handled alike

Case	Count	What establishes it	Handling
Same file	9	Identical fingerprint, bit for bit	Held, does not re-enter the queue
Two photographs of the same form	5	Matching policy number, registrations, date and time	Match proposed, confirmed by the handler

Why the five are not merged alone

LINDBERGH FORMATION — a simplified joint-stock company with share capital of €250,000 · Registered office: 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114 · SIRET 817 946 114 00029 · VAT FR 60 817 946 114 · "Blue Lemon Agent" trade mark · Training-provider registration no. 119 108 635 91 (Île-de-France prefect — this registration does not amount to State approval) · Qualiopi certified, no. 03896, for the "training actions" category · contact@bluelemonagent.ai · dpo@bluelemonagent.ai · Hosted in France.

Two closely similar photographs can be **two forms from the same day for the same policyholder** — a pile-up produces two. **Merging wrongly would make a claim disappear, and a disappearance does not show up in a count.** The match is therefore proposed, never applied.

What the batch returns

Batch measure	Value
Filings received	210
Duplicate openings avoided	14
Of which with no question put	9
Clicks asked of the handler	5

Five clicks this morning, against **a file reopened three weeks later** — that is the only comparison that counts, and it can be checked against the firm's own logs.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
