

The count on your forms — and how to check it yourself

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. The firm, the claim forms and the counts are invented; no real person is named. **No recognition rate is claimed for this offer.** This document explains what is provided instead, and why it is more useful.

Why a quoted rate would say nothing about your documents

A recognition rate **describes a set of documents, not a piece of software**. The same engine, on a form photographed at the roadside and on a form run through a flatbed scanner, does not return the same result — **and that gap is wider than the gap between two engines on the market**. A brochure figure would be about somebody else's documents.

What is provided instead, redone for every batch

Day	Forms received	Read in full	Set before the referent
-----	----------------	--------------	-------------------------

LINDBERGH FORMATION — a simplified joint-stock company with share capital of €250,000 · Registered office: 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114 · SIRET 817 946 114 00029 · VAT FR 60 817 946 114 · "Blue Lemon Agent" trade mark · Training-provider registration no. 119 108 635 91 (Île-de-France prefect — this registration does not amount to State approval) · Qualiopi certified, no. 03896, for the "training actions" category · contact@bluelemonagent.ai · dpo@bluelemonagent.ai · Hosted in France.

This morning	210	179	31
Yesterday	204	168	36
The day before	209	171	38

The curve has been rising since Monday filings started going through the extranet rather than the mailbox — the extranet requires the form to be laid flat, the mailbox accepts any photograph.

What the confidence level measures, and what it does not

What confidence measures	What it does not measure
The sharpness of the character: contrast, complete shape, absence of noise	Whether the character recognised is the one that was written

A perfectly crisp « 0 » on a numberplate, in a typeface where O and zero look alike, gives high confidence and can be wrong. That is why the fields exposed to substitution — registration, policy number, date — are checked against **their expected structure and against the firm's portfolio, whatever the confidence**

The measurement protocol proposed, on your own forms

Step	What it requires	What it returns
1. Assembling	500 forms already handled by hand	A reference set that is yours
2. Reading	Nothing on your part	The full extraction of the 500
3. Comparison	Your existing keying	The gap field by field: registration, date, time, 17 boxes
4. Tuning	One threshold decision per field	The dial set where you want it, with figures on both sides

Recommendation: start with the 500 forms from the two largest introducers — **61 % of the firm's filings**. That is where the tuning pays back fastest.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
