Four hundred and twelve open requests, thirty-eight follow-ups

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **A closed request is a request that drops out of the chasing** — and if the reply missed the point, nobody will ever know.

Status	Requests
Carrying "reply sent", not closed	**412**
Of which the requester wrote again	**38**

Those 38 are the whole argument: closed, they would have come back as new requests, without their history, and the process would have started from zero.

What the agent writes instead of closing

Marking	Written?	Effect

"Reply sent on [date]"	**Yes**	**The request stays in the chasing**
"Handled"	**No**	**It would drop out**
"Closed"	**No**	**Same**

Who can close

Who	Can close?
A person in the department	**Yes**
The requester, by confirming	**Yes**
The agent	**No**

The dashboard looks worse. It is accurate, which is not the same quality.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
