End-to-end time

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for demonstration. **Both measures are available. You can have both.**

What is produced if you ask

Measure	Lawful?	What comes with it
Average handling time per department	**Yes**	**—**
Requests received and sent back per department	**Yes**	**—**
Individual level	**Yes**	**Information notice (art. L1222-4) and works council file**

The effect of per-department time

Step	Consequence

A department is compared on its time	**It sends back faster anything not obviously its own**
Every send-back looks justified	**The sum does not**
Observed result	**41 requests with two round trips, eleven days lost each**

The measure proposed instead

Measure	Attributed to	Does a fast send-back improve it?
End-to-end time, from lodging to the answer reaching the requester	**The chain, not the last link**	**No — it worsens it, it adds a leg**

What it makes visible immediately

Finding	Value	Reading
Requests with two round trips	**41**	**Stop being invisible**
"Other" category, six months ago	**104**	**—**
"Other" category, today	**312**	**Symptom of the circuit, not sloppy sorting**

For the company to settle

Measure chosen: _____

End-to-end time threshold triggering an alert: _____ days

---

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
