Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **Both measures are available.**
You can have both.

What is produced if you ask

Measure	Lawful?	What comes with it
Average handling time per department	Yes	—
Requests received and sent back per department	Yes	—
Individual level	Yes	Information notice (art. L1222-4) and works council file

The effect of per-department time

Step	Consequence
------	-------------

A department is compared on its time	It sends back faster anything not obviously its own
Every send-back looks justified	The sum does not
Observed result	41 requests with two round trips, eleven days lost each

The measure proposed instead

Measure	Attributed to	Does a fast send-back improve it?
End-to-end time, from lodging to the answer reaching the requester	The chain, not the last link	No — it worsens it, it adds a leg

What it makes visible immediately

Finding	Value	Reading
Requests with two round trips	41	Stop being invisible
"Other" category, six months ago	104	—
"Other" category, today	312	Symptom of the circuit, not sloppy sorting

For the company to settle

Measure chosen: _____

End-to-end time threshold triggering an alert: _____ days
