Technical framework — where your files and strategies live

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Local inference, per-file partitioning · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **Local inference means the model computes on your machine: the text of an exhibit or of a draft pleading does not leave your network to be analysed.** The other available route is an isolated resource hosted in France, under French law, dedicated to the legal department.

What a litigation file holds, and must stay with you

Content	Why it is sensitive	Where it stays
Your own analysis of your own weak points	**It has value only to the opponent**	**Inside your walls**
The exhibits you hesitate to serve	**Their very existence is information**	**Inside your walls**

Content	Why it is sensitive	Where it stays
Exchanges with your counsel	Confidentiality of the relationship	Inside your walls
Prices, margins and employee data	Sensitive beyond the dispute	Inside your walls, redacted before any service

The arrangement, point by point

Element	What is put in place
Location	**A machine at the company, or an isolated resource hosted in France, under French law**
Transfers	**Deployment objective: processing and access within the European Union — architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity**
Training	**No exhibit and no draft pleading trains any model**
Partitioning	**Rights follow the file: a lawyer opens their own; the assistant opens deadlines without opening draft pleadings**
Encryption	In transit and at rest
Consultation log	**Who opened which exhibit, when, for how long**
Supervision	**Web dashboard and supervision from a phone**: approving a service, withdrawing a mandate
Higher-tier options	SecNumCloud and hardened hosting according to the level required

The question asked at renewal by a legal-expenses insurer and by the firms is always the same: where the files are hosted and who has access. **The answer fits on one page, produced in a few seconds, and carries the name of every authorised person.**

The next step proposed

Scope	Volume	State of readiness
Live disputes	**23 files**	**Covered**
Live contracts	**140**	**22 falling due within six months already read**
of which penalty clauses comparable to the main file	**9**	**Clause-by-clause list deliverable within 3 days**

Opening the contracts scope — decision and date: _____

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
