What arrives here and nowhere else

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **The named channel has a cost: being seen asking.**

Type of subject	Arrives through named channels?	Arrives here?
A scheme you did not know about	**Rarely**	**Yes**
A rule you think you broke	**Almost never**	**Yes**
An entitlement you dare not claim	**Almost never**	**Yes**
An ordinary practical question	**Yes**	**Yes**

A tool that does not judge collects what meetings never collect. That is information about the company, not about the people.

What is reported from these subjects

Element	Reported?

The subject	**Yes, above five people**
The department	**No**
The fine period	**No**
That a "worrying" subject came up	**Never, even aggregated, even to the HR director alone**

On these subjects the threshold is not a formality: it is what keeps the tool receiving these questions at all.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
