Seven hundred and fifty-four questions with no written answer

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

1,840 questions · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **The FAQ measures internal documentation better than any audit.**

Indicator	Value
Questions asked	**1,840**
With no answer in the 214 documents	**754**
Share	**41%**
Concentrated on the 20 commonest subjects	**61%**

The answer exists, in three people's heads, and travels desk to desk. That is not documentation, it is availability — it disappears with a departure or a day's leave.

Why the agent does not answer anyway

A plausible answer on an internal subject is **undetectable**: nobody can check it, precisely because nothing is written. This is the case where inventing would be **least visible and most serious**.

What it produced in three months

Result	Value
Pages written by the departments	**34**
Fall in the corresponding questions	**71%**

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
