Six qualifications prepared

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Four reasoned proposals, two files pending · none is approved · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **None of the proposals below is a legal qualification**: each carries the label "proposal — not approved" until the head of compliance has settled, dated and signed it.

The four reasoned proposals

Use case	Reasoned proposal	What is established	What remains an assumption
Claim reading	General regime — the tool reads and transcribes, it decides no cover	The output is reviewed by a handler on 100% of abnormal cases	That the current review rate holds as volume grows
Complaint triage	General regime, with heightened traceability given the effect on handling time	The tool orders a queue; it closes no complaint	That low priority has no practical effect of refusal

Use case	Reasoned proposal	What is established	What remains an assumption
Fraud detection on claims	To be assessed for its effects on people: a flag delays a reimbursement	No flag alone suspends a payment; a person reviews it	That human review stays real as volume grows
Rewriting assistance for protection quotes	General regime — a drafting tool, with no effect on pricing	The tool accesses no pricing parameter	That usage does not drift towards assisting the calculation

The two pending files, and the precise question that unblocks each

Use case	What is missing	Question asked	To whom
Assistance with protection claim assessment	The description of the affected population and the human override regime	Does the tool propose a route that a handler arbitrates, or does it condition access to the benefit?	Benefits director
Drafting assistant for member correspondence	The supplier's information on the nature of the model used	Is the model a general-purpose AI model within the meaning of the regulation?	Supplier, under the information clause of contract CT-2025-042

> **These two files are not late: they are blocked on purpose.** Proposing a qualification without the affected population or without the nature of the model would fill a gap with an assumption, and then let that assumption be read as a fact.

The sources behind every rule cited

Each proposal refers to the sources reproduced in the "regulatory-timetable" artefact, with **the address consulted, the consultation date and the version**. A rule lacking those three is not applied.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
