Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **No compliance rate is produced**. An accessibility audit binds the authority, and a figure produced by a tool is not one — this record prepares the audit, it does not replace it.

Point	Observable by a tool?	Why
Does the alternative describe what matters?	No	Requires judging content
Does the reading order make sense?	No	Requires following an argument
Does a complex table stay comprehensible aloud?	No	Requires listening
Does a long form stay usable by keyboard?	No	Requires trying it

412 images do have an alternative, so no tool flags them. I read 40 at random: **17 say "image" or repeat the file name.** Technically compliant, practically useless — and exactly what an automatic compliance rate would hide.
