Technical framework — where the candidates' tenders live

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Local inference, read-only, tenders sealed until the opening hour · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **0 tender out of the authority's network and processing in the EU targeted over 512 tenders and 1,340 traced outputs. Both measures can be checked on the authority's own log, without us.**

The two deployment routes, at the authority's choice

Route	What it means	What the authority gains
Local inference	**The model computes on a machine of the authority**	**A tender price and a candidate's technical bid cross no external network**
Isolated resource hosted in France	**An environment dedicated to Roche-Vallon, under French law**	**No pooling with another authority**

What protects the tenders, point by point

Protection	How it is checked
Tenders sealed until the opening hour	**No opening before the date and time in the consultation rules — timestamped in the log**
Read-only	**The technical account has no right to write — checked with one command**
No training on tenders	**Neither our model nor a third party's**
Role-based access	**29 roles for 26 buying departments and 3 functions of the service — 0 access outside role since go-live**
Encryption	In transit and at rest
Hosting in France, under French law	**Architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity, including against a US player hosting in Europe**

The exit, verifiable before deliberating

Item	What it becomes the day the authority stops
Index of the 1,040 procurements	**Deleted — it contained no file, only what was needed to find them**
34 standard documents, 12 answers to candidates, 4 family sheets, need form, tracker, analysis grid	**Stay with the authority, office format, readable without us**
Buyer profile, financial software, document management	**Unchanged — no migration in, therefore none out**

The dry-run exit takes place at the end of the first quarter, in half a day: we switch off, we check that the service runs a procurement exactly as before, we switch back on. **The least costly date is the first Friday of August — no procurement has a deadline that day.**

Date chosen for the dry-run exit, settled by the community board: _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
