Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **The index contains no tender: it contains what is needed to find the files where they already are. The authority's nine years of archives have not moved by a single byte, and the technical account through which the agent reads has no right to write.**

What rereading the nine years returned

Archive reread	Volume	What the agent draws from it
Procurements archived	**1,040**	**27 comparable road works procurements, two lotting configurations**
Tenders submitted	4,900	**The document forms companies actually file**
Standard documents of the service	**34**	**11 referring to earlier wording — rewritten overnight**

Archive reread	Volume	What the agent draws from it
Candidate questions	214 over the year	**12 forms of question make 163 of the 214**

The gap that shows in public spending

Configuration	Procurements	Price accepted / estimate
A single tender received	**9 of 118**	**+12 %**
Four tenders or more	**63 of 118**	**−4 %**
Difference	—	**16 points — €214,000 on the 9 single-tender procurements**

The three time items, before and after

Item	Share of time today	Share of time with the agent	Over the year
Completeness check on a procurement	**60 % — 6 h out of 10**	**16 % — 1 h 36**	**118 procurements → 519 hours**
Preparing the tender comparison	**30 % — 4 h 30 out of 15**	**10 % — 1 h 30**	**118 procurements → 354 hours**
Handling candidate questions	**8 % — 3 h 12 out of 40**	**6 % — 2 h 24**	**118 weeks → 94 hours**

967 hours returned to the service over one year, at unchanged headcount — two buyers, a procedures officer, a head of service. **The calculation can be redone on the authority's procurement logs: that is what makes it defensible in front of elected members.**
