Unfounded missing-document flags — 11 then 1

The figure the agent publishes about itself, its measured cause and its correction · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. **This exhibit is published by the agent itself. A missing-document flag opens a request for regularisation, never a rejection: no candidate was excluded, and all 11 stayed in their procurement.**

The measure, two quarters running

Quarter	Flags	Unfounded	Share
First	**256**	**11**	**4.3 %**
Second	**243**	**1**	**0.4 %**

The cause, measured and not supposed

Cause	Cases	Correction applied	Measured effect

Certificate filed under an unusual title	**7 of 11**	**Every document read by its content, not by its title**	**0 case in the following quarter**
Qualification presented in an equivalent form	**4 of 11**	**9 further forms of certificate added to the check**	**1 single case in the following quarter**

What became of the 11 candidates

Step	Result
Candidates informed the same day	**11 of 11**
Candidates who replied	**11 of 11**
Candidates who stayed in the procurement	**11 of 11**
Candidates excluded	**0**

The rule that holds the result

Mechanism	What it produces
Every flag carries the file and the page where the agent looked	**It is lifted in thirty seconds**
Flags of the quarter with file and page cited	**243 of 243**
Regularisations obtained within 48 hours	**232**
9 accepted forms of certificate written into the standard rules	**Candidates know what is accepted before they file**

Writing the 9 accepted forms of certificate into the standard consultation rules lowers the number of regularisations for everyone: for the authority, which writes fewer letters, and for the companies, which file correctly first time.
