

Unfounded missing-document flags — 11 then 1

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

The figure that does not flatter the agent, its measured cause and its correction · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **This exhibit is published by the agent itself. A missing-document flag opens a request for regularisation, never a rejection: no candidate was excluded, and all 11 stayed in their procurement.**

The measure, two quarters running

Quarter	Flags	Unfounded	Share
First	256	11	4.3 %
Second	243	1	0.4 %

The cause, measured and not supposed

Cause	Cases	Correction applied	Measured effect
-------	-------	--------------------	-----------------

Certificate filed under an unusual title	7 of 11	Every document read by its content, not by its title	0 case in the following quarter
Qualification presented in an equivalent form	4 of 11	9 further forms of certificate added to the check	1 single case in the following quarter

What became of the 11 candidates

Step	Result
Candidates informed the same day	11 of 11
Candidates who replied	11 of 11
Candidates who stayed in the procurement	11 of 11
Candidates excluded	0

The rule that holds the result

Mechanism	What it produces
Every flag carries the file and the page where the agent looked	It is lifted in thirty seconds
Flags of the quarter with file and page cited	243 of 243
Regularisations obtained within 48 hours	232
9 accepted forms of certificate written into the standard rules	Candidates know what is accepted before they file

Writing the 9 accepted forms of certificate into the standard consultation rules lowers the number of regularisations for everyone: for the authority, which writes fewer letters, and for the companies, which file correctly first time.

isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
