Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **Every company in the pool is tied to a published award notice** — authority, subject, year. **No company is guessed: they are read where public procurement publishes them.**

The 34 companies, by purchasing family

Purchasing family	Companies identified	Of which within 40 km	What your procurements received
Road works	**12**	**7**	2 to 3 tenders depending on lotting
Green space maintenance	**9**	5	**1 tender on the last three procurements**
Intellectual services	8	2	2 tenders on average
Workshop supplies	5	3	2 tenders on average

What every line of the pool carries

Information	Origin
Company name and location	**Published award notice**
Subject of the contract won and year	**Published award notice**
Awarding authority	Published award notice
Purchasing families the company bids on	**Reconciliation of subjects over three years**

What goes out, and in the same way to all

Sending	Content	Regularity
Complementary notice	**The same notice, the same day, to the 34 companies of the family concerned**	**It adds to the regulatory publication on the buyer profile, it does not replace it**
Sending log	**Recipients, date and time**	**Equal treatment is proved, not declared**

The pool grows on its own: every published award notice matching one of your purchasing families feeds it. **It costs the service not one hour, and at every procurement the list of companies that bid on that subject is already prepared.**
