Document issued on 24/09/2026

Four purchasing families, every line tied to a published award notice · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **Every company in the pool is tied to a published award notice** — authority, subject, year. **No company is guessed: they are read where public procurement publishes them.**

The 34 companies, by purchasing family

Purchasing family	Companies identified	Of which within 40 km	What your procurements received
Road works	12	7	2 to 3 tenders depending on lotting
Green space maintenance	9	5	1 tender on the last three procurements
Intellectual services	8	2	2 tenders on average
Workshop supplies	5	3	2 tenders on average

What every line of the pool carries

Information	Origin
Company name and location	Published award notice
Subject of the contract won and year	Published award notice
Awarding authority	Published award notice
Purchasing families the company bids on	Reconciliation of subjects over three years

What goes out, and in the same way to all

Sending	Content	Regularity
Complementary notice	The same notice, the same day, to the 34 companies of the family concerned	It adds to the regulatory publication on the buyer profile, it does not replace it
Sending log	Recipients, date and time	Equal treatment is proved, not declared

The pool grows on its own: every published award notice matching one of your purchasing families feeds it. **It costs the service not one hour, and at every procurement the list of companies that bid on that subject is already prepared.**

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
