Technical framework — where household situations live, and how you get out

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Local inference, read-only, processing in the EU targeted · fictitious document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictitious document**, produced for the demonstration. **It describes the architecture actually offered.** A CCAS handles income, rent, household composition and sometimes health information: **this is the most intimate data a town holds, and it is only the custodian of it.**

The two deployment modes, at the CCAS's choice

Mode	Where the computing happens	What leaves the network	For whom
Local inference	**On a machine belonging to the CCAS**	**Nothing**	Organisations that already run a server
Dedicated resource	On a dedicated server hosted in France, under French law	**Nothing outside the European Union**	Organisations that prefer not to administer a machine

Local inference means the model computes on your own machine: the content of a social case file crosses no external network to be processed. **In both cases the resource is dedicated to the CCAS of Verneuil-en-Brie: no pooling with another CCAS** — that is the condition for the continuity of the service.

What protects households' situations

Point	Implementation	What the CCAS can write to a resident who asks
Training	**No household data feeds any model, neither ours nor a third party's**	« Your situation trains no system »
Write permissions	**The technical read account has no write permission**	« The tool cannot alter any file, technically »
Encryption	In transit and at rest	« A stolen device stays unreadable »
Role-based access	**Rights follow the job**: meals-on-wheels staff do not open assistance files, the accounts secretariat sees amounts paid and not social assessments	« Each officer sees only what their duties require »
Nothing goes out in the clear	**No outgoing message names the reason for an application or any element of a situation**	« What is sent to you reveals nothing to anyone reading over your shoulder »
Logging	Who asked what, when, and what the system produced	« Every output is traceable »
Hosting	**France, under French law**, architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity	« Deployment objective: processing and access within the European Union »

The acts reserved to a public officer — and what the agent brings to each

Reserved act	Whose it is	What the agent has already done when it arrives
The social assessment	**The social worker's**	**The one-page summary, documents checked, disposable income calculated line by line and three years of assistance history**
Deciding on discretionary assistance	**The award committee's**	**The meeting notes, the table of amounts and the budget line — 16 minutes instead of 80**
Deciding below the threshold in the rules	**The head of service's, under delegation**	**The complete file the same day, emergency relief included**
Signing a notification	**The head of service's**	**The reasoned letter, with the calculation in plain terms and the CCAS's appeal routes and time limits**
Deciding to recover, spread or waive an overpayment	**The board's**	**The amount, the period, the document that establishes it and an instalment plan calculated on disposable income**

The exit — verifiable before deciding, not after

Element	What becomes of it on the day of shutdown	What stays with the CCAS
The index	**Deleted**	**The three years of case records have not moved by a single byte** — same files, same access, same rights

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —

Element	What becomes of it on the day of shutdown	What stays with the CCAS
The log of requests and outputs	Handed over in an open format, or destroyed	**The board chooses, and the question is settled at go-live**
The 23 updated standard letters	They are already in your files	**They are made of the CCAS's own material: they belong to it**
The 12 standard answers of the CCAS, in everyday French	Exported in a format readable without us	**They stay usable at the counter and on the website**
The subscription	**Annual, no tacit renewal, below the direct award thresholds**	**It is renewal that requires a decision, not termination**

> **A half-day dry-run shutdown is offered at the end of the first quarter**: we switch off, we check the CCAS works exactly as before, we switch back on. **The board will know what the promise is worth before committing to a second year.**

For the CCAS to settle

Deployment mode chosen (local inference / dedicated resource): _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the

encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
