Technical framework — where reader data lives, and how you leave

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Local inference, read-only, processing in the EU targeted · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. **It describes the architecture actually proposed.** A media library holds memberships and loan data: **these are personal data, and they touch on the freedom to read.**

The two deployment modes, at the network's choice

Mode	Where the computing happens	What leaves the network	For whom
Local inference	**On a machine at the media library**	**Nothing**	Networks that already run a server
Isolated resource	On a dedicated server hosted in France, under French law	**Nothing outside the European Union**	Networks that would rather not run a machine

Local inference means the model computes on your machine: the text of a record or a membership form crosses no external network to be processed. **In both cases the resource is dedicated to Trois-Rivières: no pooling with another media library** — that is the condition of continuity for your public service.

What protects reader data

Point	Implementation	What the media library can write to a user
Training	**No user data feeds a model, neither ours nor a third party's**	« Your reading trains no system »
Write rights	**The read-only technical account has no right to write**	« No record can enter the catalogue without a member of staff acting »
Encryption	In transit and at rest	« A stolen drive stays unreadable »
Role-based access	**9 roles for 9 staff**: front-desk staff see availability, not membership files; the digital outreach officer sees the diary, not loans	« Each member of staff sees only what their job requires »
Logging	Who asked what, when, and what was produced	« Every output is traceable »
Hosting	**France, under French law**, architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity	« Deployment objective: processing and access within the European Union »

What the agent connects to — with no migration

Tool already in place	What the agent does there	What changes for the team

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Library management system	**Reads the catalogue and availability**	**No writing, no catalogue re-entry**
Network portal	Prepares texts, selections and availability	Publishing stays with the librarians
Telephony and mailbox	Answers on the 14 subjects, within the mandate	Calls outside those subjects arrive qualified
Events diary	Informs, records sign-up requests	**Sign-up is settled by the member of staff running the session**
User channels	**WhatsApp, portal chat, email, phone**	**No account to create, nothing to install**
Internal tools	Teams, Slack or the staff mailbox	No extra subscription for the team

The way out — checkable before the vote, not after

Item	What becomes of it on the day you stop	What stays with the media library
The index	**Deleted**	**The 34,000 records have not moved by one byte** — same software, same fields, same rights
The 1,100 enriched records and the 3,500 records of the year	Already entered by your staff	**In the exchange format your software already uses, readable without us**
The 30 shelfmarking rules written down	Handed over in an open format	**They lived in the team's heads; they are now written**
The 14 answers, in plain language and easy-read	Handed over in an open format	Usable at the desk and on the portal

Item	What becomes of it on the day you stop	What stays with the media library
The log of requests and productions	Handed over in an open format, or destroyed	**The council chooses, and the question is settled at go-live**
The subscription	**Annual, with no tacit renewal**	**It is renewal that requires a decision, not stopping**

> **A dry-run exit is proposed at the end of the first quarter**, half a day: we switch off, we check that the three sites work exactly as before, we switch back on. **The least costly date is the first Tuesday of September — 41 visitors that day against 380 on a Wednesday.**

For the media library to decide

Deployment mode chosen (local inference / isolated resource): _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.
> https://bluelemonagent.ai/en/secteur-public/metiers/agent-ia-agent-bibliotheque

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
