What the agent does alone, and what is logged

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

3 reversible actions, 4 decisions that stay with a person · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **Three actions, not one more, and each is withdrawn with a word.** Everything else waits for a request. This is the page to hand to the elected member who asks.

The three actions

Action	Rhythm	The reverse is true as well	Withdrawal
Preparing the records of the documents that came in during the day	**Every night**	**A document removed from the collections disappears from the lists at the same hour — no copy of what the media library has removed**	With a word
Keeping availability and remaining seats up to date	**Continuously**	**A seat freed up shows as fast as a seat taken**	With a word

Action	Rhythm	The reverse is true as well	Withdrawal
The week's summary to the director	**Every Monday**	**It goes to her alone, and contains no reader's name**	With a word

Availability is the only figure the agent publishes of its own accord, for a simple reason: **a wrong figure on availability makes someone travel for nothing.**

The four decisions that stay with a person

Decision	Whose it is	What the agent hands over
Entering a record into the catalogue	**The head of cataloguing**	**The complete record, sources alongside, empty fields named — 3,500 times out of 3,500 this year**
Choosing, acquiring, removing a document	**The librarians**	**Counted public demand, the 830 titles ranked for weeding, prices and supplier availability**
Settling the cultural programming	**The director**	**Attendance by session and by slot, the rescheduling prepared and its poster**
Answering outside the fourteen subjects	**A member of staff**	**The draft reply already written, sourced and dated**

On measuring people — the argument is mechanical, not moral

Indicator	Produced?	Reason
Questions handled per member of staff	**No**	**It becomes a target within three weeks: people take the short requests and leave the long ones**
Reading advice per member of staff	**No**	**It is the longest exchange of all: it would disappear from the counter before it disappeared from the front desk**

Indicator	Produced?	Reason
Requests received by channel and by hour	**Yes**	Says where to put the welcoming effort
Shelves where the public leaves empty-handed	**Yes**	**Collection information, with not a single name on it**

The log — what is recorded

Item	Recorded?	Detail
Request received and channel	**Yes**	Time-stamped
Output prepared and its source	**Yes**	Record, rules of use, fee decision or portal page, with its date
Approval	**Yes**	**Who approved, when, and what was corrected**
A person's borrowing history	**No**	**It is neither read, nor logged, nor copied**
Readers of the log	**The director and the head of cataloguing**	**Retention period set by the service**

> **The log serves to answer a user who asks what the media library holds about them**, and to prove, if challenged, who approved what. **It is evidence the network had on none of its tools.**

For the media library to decide

Retention period of the log set by the service: _____ months

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
