Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **A general document list makes people come back; a list drawn up for their situation makes them come once. For a national living nine hundred kilometres away, that is the whole difference between a procedure and a journey.**

What the agent does before the person sets off

Step	Content	Effect
List drawn up for the situation	**According to the record requested, the country where it was drawn up, the parents' nationality and what the post already holds**	**191 of the 480 requests of the year did not need a document the general form nevertheless asks for**
Readability	The applicant's, **French version alongside**	The person understands what is being asked

Step	Content	Effect
Check from a photo	**Before the journey**	**An incomplete sworn translation or a record that is too old shows up then, not at the counter**
Reminder	Three days before the appointment, with the list	**11 people arrived without their documents out of 640 appointments, against 96 last year**

The result measured over the quarter

Measure	Last year	This quarter	What it changes for the national
Files complete on arrival	**4 out of 10 left incomplete**	**310 out of 310**	**A procedure completed the same day instead of a second journey**
Files coming from beyond 400 km	—	**124**	**118 second journeys avoided**
Travel distance avoided	—	**At least 94,400 km**	**Two days and a night in a hotel per round trip from the north**
Counter visit	40 minutes	**15 minutes**	The preparation is done upstream

Website chat	The same check, from a computer	Nothing
