Marginal notes — 23 found and entered

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

310 notes matched to their records across 9 years · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. *A marginal note is the entry made in the margin of a record to report a later event: marriage, divorce, death, change of name.* **A record without its note describes a situation that is no longer true — and it is the national who finds out, often at the worst moment.**

The matching, across nine years of registers

Finding	Volume	Reading
Notices received and matched	**310**	Over the year
Notes entered	**287**	—
Received and never entered	**23**	**The oldest goes back four years**

Finding	Volume	Reading
Measured cause	—	**Notices that arrived during a seasonal peak, when four officials were holding civil status and travel documents at the same time**
Records since issued as copies	**11 out of 23**	**Those eleven people will receive the updated version without having to ask**

What each of the 23 drafts carries

Element	Content	Who decides
Original notice	**Reproduced, with its date of receipt at the post**	—
Record concerned	Year, number, register	—
Exact wording to be entered	**Drafted according to the post's templates**	**The chancery officer signs off, the authorised official enters**
Letter to the holder	Drafted in plain language, the entry explained in two sentences	**The post sends it**

The routine that stops it happening again

When	What the agent does	What falls to the post	Measured effect
The day the notice arrives	**Matching of the notice and the record**	—	**No notice sleeps in a tray**
The next morning	**Draft placed for the chancery officer's sign-off**	**The sign-off, then the entry by the authorised official**	**Over the past year: 23 unentered notes → 0**

The counter the post will never keep — and why

Indicator	Kept?	Reason — mechanical, not moral
Notes entered per official	**No**	**The day that number is tracked, it becomes a target: people enter what can be entered quickly and put off the file that calls for research**
Time between the notice received and the note entered	**Yes**	**That is the delay as seen by the national, and it names nobody**
Notices pending	**Yes**	Two figures the head of post reads in ten seconds

> **It is precisely the difficult file that needs entering**, and it is the one an individual counter would push back. **The delay and the queue say the same thing, without putting a single name on it.**

To be set by the post

Date of the morning set aside to enter the 23 notes: _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
