Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **The record is drawn up and signed by the post's authorised official — the AI agent hands them the complete, checked and reasoned draft in ten minutes instead of fifty.** *Transcription is the operation by which a record drawn up by the local authorities is entered in the consular civil-status registers.*

What the draft takes up, and where it comes from

Element	Content	Source

Comparison	**Surnames, given names, dates, places, parentage — line by line**	**Local record and its sworn translation**

Element	Content	Source
Parent's French nationality	Proof found at the post	**2019 file — the national does not have to produce it a second time**
Family record book	Entries to be made identified	The post's register
Application sheet	Pre-filled	What the post already holds
Drawing up and signing the record	**Left to the authorised official**	**The post**

Total	**9 points compliant, 1 to confirm**	**Nothing is settled by the agent, nothing is left hanging**
