Wrongly reported discrepancies — 31, then 6

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

14.5 % → 3 % after three reading rules · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **This is the figure the agent publishes about itself, and the office has it from the agent rather than from a declarant.** It is given with its measured cause, what was done about it, and the following quarter.

The first quarter

Measure	Value	Share
Discrepancies reported	**214**	100 %
Reports that were not discrepancies	**31**	**14.5 %**
of which due to a way of writing, not to a mistake	**22**	**71 % of wrong reports**
of which goods descriptions specific to one sector	9	29 % of wrong reports

The 22 reports due to a way of writing

What I was reading	What was written	Number	Reading rule written
A date inconsistent with the filing	**Day and month reversed on one foreign supplier's invoices**	**11**	**Format recognised, with the document that evidences it**
A weight out of all proportion to the quantity	Imperial units on one carrier's transport documents	7	Conversion flagged, original value kept
A missing currency	Currency spelled out in full instead of its code	4	Wording-to-code match, with no interpretation

This was not a mistake in the declaration: the declaration was right, it was the reading that was not. The cause lay in the form of the documents, not in the case — and that is why it is corrected once and for all.

The following quarter

Measure	Quarter 1	Quarter 2	Change
Discrepancies reported	214	198	—
Wrong reports	**31 — 14.5 %**	**6 — 3 %**	**−25**
of which due to a document format	22	**0**	**The cause is gone, not only the symptom**
Requests for documents spared to companies	—	**25**	**25 cases that did not stop for nothing**

The rule that holds everything else — ask rather than infer

Situation	What the agent hands over	What it gives

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

A document is unreadable or missing	**What is missing, where it looked, who holds it — and the request already drafted to its addressee**	**84 unreadable values over the quarter, 84 requests prepared, 71 answers back within eight days**
An amount cannot be read	The absence flagged, the reference to the document, and the request ready to go	**A guessed value would be indistinguishable from a read value: that is what makes 3 % a figure that can be relied on**

The protection that counts for the signature

Indicator	Two quarters
Reports handed over	**412**
Approved by an officer before any dispatch	**412**
Corrections made before dispatch	**37 out of 37**
Corrections made after dispatch	**0**

> **The 12 declarants whose documents use these formats receive a one-page note:** this is not a watch list, **it is a mailing list** — it explains what slows their case down. **9 of them file every week: their case will go through first time.**

To be settled by the service

Chosen frequency for the record of wrongly reported discrepancies: _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
