Where applicant data lives

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Architecture, access rights, legal framework · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **The legal references quoted are real; the figures and names are invented. Everything asserted here can be checked on the machine, with one command — that is the point of the document.**

The two possible architectures, and what separates them

	Local inference	Dedicated resource hosted in France
Where the model computes	**On a machine belonging to the office**	On an isolated resource, in France, under French law
What leaves the office's network	**Nothing**	The encrypted stream to the dedicated resource, and nothing else
Sharing with another organisation	**None**	**None — the environment is dedicated to Habitat des Trois Vallées**

	Local inference	Dedicated resource hosted in France
Exposure to the Cloud Act and to FISA 702	**Reduced — nothing leaves the network**	**Reduced by the architecture; location alone is not enough, and the exposure is documented for the configuration chosen**
What the office administers	One machine and its backups	Nothing — operations are provided

Local inference, in one sentence: the model computes on your machine. The contents of a tax assessment notice, of an emergency accommodation certificate or of a social services report **cross no external network to be processed**. That is the route chosen at Habitat des Trois Vallées.

The seven roles, and what each one opens

Role	People	What it opens	What it does not open
Caseworker — northern area	2	Applicant files for their area, supporting documents	Files from other areas
Caseworker — southern area	3	Applicant files for their area, supporting documents	Files from other areas
Head of service	1	Every file, sitting files, the full log	Technical settings
Apprentice	1	Anonymised files for training, letter templates	**No named file**
Committee member	9	The file for the sitting they attend, for 30 days	**Any file outside their sitting**
Tenancy management	12	Files of housed households, property condition reports	**Files of applicants who have not been allocated a home**

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Role	People	What it opens	What it does not open
The agent's technical account	—	**Read-only** on the national registration system, tenancy management and the document repository	**No write permission — verifiable with one command**

> **Log since go-live: 0 out-of-role accesses across 5,900 files. The log carries who consulted what, when, and what the system produced** — it is the document the office produces when an applicant exercises their right of access, and it comes out in one minute instead of a reconstruction.

The legal framework, text by text

Text	What it requires	How it is held here	Since when
Article 22 of the General Data Protection Regulation	**Right not to be subject to a decision producing legal effects based solely on automated processing**	**The committee allocates and gives its reasons; nothing the agent produces takes effect without a named signature**	In force
Article 50 of the European Artificial Intelligence Act	**Inform anyone interacting with an AI system**	**The agent introduces itself as the office's digital assistant from the first sentence, in the language of the exchange under way — the notice follows the exchange, it does not translate it; a human caseworker is reachable at any time**	**2 August 2026**

Text	What it requires	How it is held here	Since when
Annex III of the same regulation	**High-risk classification of systems used to evaluate access to essential public services and benefits — high risk, not prohibited**	**Technical documentation, logging, human oversight and information of the persons concerned: the file is open and kept up to date as we go**	**Obligations applicable on 2 December 2027, deferral carried by the Digital Omnibus package**
General Data Protection Regulation, articles 5 and 30	Minimisation, storage limitation, record of processing activities	Register entry kept by the agent and handed to the data protection officer; retention periods aligned on the office's own	In force

One precision that matters, and that separates a rule of law from a rule of caution: the high-risk classification of Annex III **prohibits nothing**. It opens a regime of documentary and oversight obligations. **What really forbids automating an allocation is article 22 of the General Data Protection Regulation** — and that is already in force. **Both are held by the same arrangement: the committee decides, the agent prepares.**

Register entry — first state

Heading	Content
Purpose	Pre-assessment of social housing applications, preparation of committee files, answers to applicants
Categories of data	Identity, household composition, income, housing situation, supporting documents
Legal basis	The organisation's public interest task — to be confirmed by the data protection officer

Heading	Content
Recipients	Authorised staff of the office under the seven roles above; committee members for the sitting they attend
Retention period	Aligned on that of the application on the national registration system; logs kept _____ months
Transfers outside the European Union	**None — 0 across 5,900 files**
Sub-processing	Operation of the agent; no data trains any model

Log retention period settled by the data protection officer: _____ months

Date the register entry is approved: _____

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
