Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **The households, their income and their circumstances are invented. The three notes carry the same grid of facts, in the same order, and no ranking is produced: the committee assesses and allocates.**

These three notes are interchangeable in the order they are laid on the table. No ranking, no recommendation, no wording of the kind « the most deserving file ». The three score totals are shown because the scale is the one the urban authority adopted and because it is reproducible — **the committee remains free to depart from it with reasons, and the note provides the space to do so. It is this identity of form that makes equal treatment verifiable file by file.**
