4 fields to fill · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **The four fields are empty and stay empty.** This is the piece that best shows what the agent does: it opens the form, enters what it knows, and stops where what only the farmer saw begins.

Carried across from the invoice

Item	Filled	Source
Product	Herbicide D	Invoice of 04/08/2026
Authorisation number	AMM 2 04 00 71	Invoice
Quantity purchased	20 L	Invoice
Supplier	Verne cooperative	Invoice

To be filled by the farmer

Field or parcel treated: .....

Dose actually applied (per hectare): ..... · **Area treated:** ..... ha

Date and time of the pass: ...../...../..... at ...../.....

Conditions at the time of the pass: .....

> **Quantity purchased is not dose applied.** It is the one field the agent could have approximated, and precisely the one it does not fill: 20 litres in a can says nothing about what went onto which area.

Is an entry made after the event still valid?

Yes, if it is truthful. What is not truthful is an entry reconstructed from an invoice — it would have every appearance of a kept register and none of its qualities.

What would be automated, on your approval

Trigger	Action	Chase	What keeps it valid in an inspection
Product invoice received	A blank form opens in your name	at 48 h if still blank	**No field is pre-filled**
Form still blank at month end	It appears in the summary	monthly	**It is never closed off automatically**
