Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **A crash report often contains the screen's contents at the moment of the incident** — a basket, a half-filled form, sometimes a message.

Cause identified	Crashes	Resolved
Tied to a device model	7	7
Tied to a system version	4	4
Not reproduced	3	0

The three unreproduced stay unresolved, and that is the price. The agent prefers saying it that way to pretending the aggregate is always enough.

What the agent does in no case

Action	Done?	Why
Propose a fix for an unreproduced crash	No	It would pass tests and fix nothing

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
