One send before the first screen

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for demonstration. **Nothing indicates it in the app's code**: the component initialises itself, and that is presented as an advantage in its documentation.

Moment	What happens
Second 1	**The component transmits device identifier, system version, app name**
Second 3	**The consent screen appears**

> **The screen is accurate and ineffective**, which is the worst of both worlds: it faithfully describes a choice that was already bypassed two seconds earlier.

What the agent supplies

Element	Supplied?
A capture of what goes out	**Yes**

Element	Supplied?
The exact moment in start-up	**Yes**
The line initialising the component	**Yes**
The two documented settings that delay the send	**Yes**
Disabling the component	**No**

Why the agent does not disable it

Risk	Where it surfaces
Some components stop working if initialisation is delayed	**In production**

> **Request a demo with your own documents**
>
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
