Usage measurement — the sheet before the line of code

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **You decide on this sheet, not on a vendor's promise.**

What is supplied before writing a line

Element	Supplied?
What the component sends	**Yes**
To whom	**Yes**
How often	**Yes**
The permissions it requires	**Yes**
What it adds to the app's size	**Yes**

The measurement proposed first

Feature	Value
Events measured	**Written by you: screen reached, step completed, error encountered**
Device identifier	**None**
Location	**None**
Hosting	**At your end**
Third-party component	**None**

It answers **"where do people drop off"** without installing anything third-party.

What is not a setting but an order of operations

Finding	Problem
A third-party component opens a connection at launch	**The transmission leaves BEFORE the first screen, therefore before any consent is possible**

The permissions nobody wrote

Declared permission	Origin	Used?	Seen by the user?
Location	**Mapping library**	**No**	**Yes**
Contacts	**Same**	**No**	**Yes**
Calendar	**Same**	**No**	**Yes**

For the company to settle

Measurement chosen: _____

Consent screen before any transmission: _____

---

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
