Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **The user sees the list at install time, and cannot know which one is needed.**

Permission declared	Brought by	Called by the code?
Precise location	Mapping library	No
Contacts access	Same	No
Calendar access	Same	No

An order-tracking app asking for contacts makes people back out — and those who install anyway have accepted something that serves no purpose.

It is a trade-off, not an obvious choice. The agent supplies the three rows and stops there.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
