Scope and traceability — who decides what, and what is logged

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

The agent's terms of use, scope review, hosting · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. **The scope is strictly administrative and documentary. It holds not because it is promised but because it is logged, reviewed and checkable line by line.**

Why no targeting list is produced — the argument is mechanical

Step in the mechanism	What would happen	What would be lost
1. The score exists	It is consulted before every round	Nothing yet
2. The score becomes a target	Establishments it scores well stop being visited	**Real coverage of the area**
3. What is measured is what rises	The score improves without anything changing on the ground	**The instrument itself: it no longer says anything about reality**

Step in the mechanism	What would happen	What would be lost
4. The queue replaces the choice	The system's ordering displaces the control officer's own initiative	**The freedom art. L8112-1 grants them — and which makes an inspection stand up**

The text, cited: Labour Code, **article L8112-1** — control officers « *are free to organise and conduct inspections on their own initiative and decide what follow-up to give them* ». **What the agent does instead:** once the inspector has chosen the establishment, **the file is built before they leave** — history of reports and what followed them, documents numbered, headcounts at the relevant dates, applicable texts in the version in force then, the sector's extended collective agreement. **The agent does not choose where the inspector goes; it makes sure they do not arrive empty-handed.**

What the agent produces, and what stays with the human

Area	Produced by the agent	Decided and signed by
Regulatory letters and notices	**The complete draft, « findings » box empty**	**The labour inspector**
Document handling	**Numbering, dating, attachment, contents list, chronology**	**The labour inspector for any move**
Information replies to the public	**General law, sourced, dated, with the possible departures**	**The head of unit settles the eleven texts**
Legal research and watch	**The sweep, the templates affected, the weekly note**	**The head of unit settles the templates**
Plain language and easy read	**Plain version, easy-read draft**	**The review group validates**
Assessment of an individual situation	**Nothing — the file built, both readings written out**	**The labour inspector**

Legal notice (in French): bluelemonagent.ai/mentions-legales

Area	Produced by the agent	Decided and signed by
Findings and characterisation	**Nothing**	**The sworn control officer, art. L8113-7**
Targeting	**Nothing, and it is not a setting**	**The labour inspector, art. L8112-1**

What makes the scope checkable

Guarantee	How it is checked
Every output carries its author, its timestamp and its sources	Log open to the head of unit, export on request
Every human rewrite is recorded with its reason	**That log is what produced the 12.0 % published in the year-in-review**
Case data stays on an isolated resource hosted in France	Hosting contract, no pooling, encryption in transit and at rest
Access is by role, traced, and withdrawn with a word	Register of authorisations, quarterly review
The AI announcement is made in the first message	**Art. 50(1) of Regulation (EU) 2024/1689, applicable since 2 August 2026**; 418 requests for a human contact, 418 honoured
The scope is reviewed at every change	Scope review minutes, dated and signed

Scope review conducted by the head of the inspection unit, on: _____

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
