The three automatic actions — and how each one is undone

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Settings fixed by the head of unit, log of moves and dismissals · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **Three actions, not one more, and all three come undone. None of the three touches the content of a file or the meaning of a letter: they touch its form, its date and its place.**

The three actions

Action	Trigger	What goes out	How it is undone
Qualified acknowledgement of receipt	A report arrives, on any channel	**Acknowledgement within the minute: date of arrival, file reference, which of the three items is missing and where to find it**	**If the item arrives the next day, the acknowledgement updates and no chaser goes out**

Action	Trigger	What goes out	How it is undone
Numbering and filing to the case file	A document arrives	**Document numbered, dated, attached to its establishment file; contents list regenerated**	**The inspector moves it with a word and a reason — and that reason corrects the classification the following quarter**
Watch flag on a template	A text is published touching an article cited by a template in service	**The template is marked « to be reviewed » in the signature folder**	**The head of unit dismisses the flag with a word and a reason — and the template is never modified by the agent**

The second action renders a service you only see the following quarter: every move carries a reason and a date, **which produces the list of misreadings in your classification — and therefore the corrections to make. That is how the first quarter's 47 moves fell to 6 in the second, once the « third-party document » category had been split. A system that does not record its false positives never improves.**

Everything else waits for a named decision

Act	Who takes it	Record
Establishing an offence	**The sworn control officer — Labour Code, art. L8113-7**	Procès-verbal
Characterising the facts	**The labour inspector**	The signed letter or procès-verbal
Deciding what follows	**The control officer — art. L8112-1**	Establishment file, case application

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Act	Who takes it	Record
Sending and signing a letter	**The labour inspector**	Electronic signature folder: name, date, time
Bringing a completeness rule into service	**The head of the inspection unit**	Rule register, dated version
Changing a template	**The head of the inspection unit**	Template register, dated version
Choosing which establishments are visited	**The labour inspector, alone**	**No list is produced by the agent**

Settings for the three actions fixed by the head of the inspection unit, on: _____

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
