The regulatory watch — six sources, 214 texts, and the nine I missed

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

The unit's watch scope, texts tracked over 12 months, 24-month catch-up · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **This attachment publishes a figure unfavourable to the agent: 9 texts missed out of 214. It gives the cause, the fix and the catch-up. No template was modified: templates are settled by the head of the inspection unit.**

The six declared sources

Source	What it brings	Sweep frequency	Connected since
Légifrance — consolidated versions	Codes, decrees, dated article versions	Daily	01/01/2026
Official Journal	Acts and decrees as published	Daily	01/01/2026

Source	What it brings	Sweep frequency	Connected since
Labour Ministry official bulletin	Published instructions and circulars	Weekly	01/01/2026
Extended collective agreements of the 4 dominant sectors	Amendments and extension orders	Weekly	01/01/2026
Instructions of the Directorate General of Labour	Application doctrine	Weekly	01/01/2026
Prefecture's register of administrative acts	**Prefectoral orders: working-time derogations, young workers**	Daily	**12/04/2026 — source added after the gap below**

The published gap: 9 texts missed out of 214 — 4.2 %

Nature of the missed text	Number	Cause	What was done
Prefectoral working-time derogation orders	**6**	**Register of administrative acts not queried — absent from the initial source list**	**Source connected on 12/04/2026**
Prefectoral authorisations for young workers	**3**	**Same cause**	**Same fix**
Total	**9 out of 214 — 4.2 %**	—	—

Why this gap is published rather than quietly fixed: a watch whose blind spots are unknown reads as a complete watch, and **that is exactly when it becomes dangerous**.

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

The list of six sources is the boundary of what I see; anything not on it, I do not see, and you should be able to read that here rather than discover it on a case file.

The 24-month catch-up

Catch-up result	Number	Effect on templates
Prefectoral orders recovered over 24 months	**31**	—
Of which touching an article cited by a template in service	**4**	**Templates marked « to be reviewed » in the signature folder**
Templates modified by the agent	**0**	**The head of unit settles templates**

Time to reach the templates, before and after

Step	Before	After
Text published → spotted	**9 days on average**	**Under 24 hours**
Spotted → templates affected identified	Not done systematically	**Automatic, by article citation**
Dependence on one person being at their desk	**Total**	**None**

Weekly watch note — with case-law review: yes / no — settled by the head of unit, on: _____

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
