Statutory notice — 7 missing figures

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Filing due tomorrow · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **This notice is handed over incomplete, and that is the point.** An empty box that says what is missing beats a full box that will have to be corrected without anyone knowing which one.

The eleven figures, and what became of them

#	Figure	State	Origin or holder
1	Reference floor area	**Carried across**	Descriptive notice, p. 4
2	Climate zone	**Carried across**	Project location
3	Site altitude	**Carried across**	Surveyor's report of 12/03/2026
4	Building category	**Carried across**	Brief, cl. 2.1

#	Figure	State	Origin or holder
5	Bioclimatic demand	**Missing**	Thermal study — engineer, not delivered
6	Primary energy consumption	**Missing**	Thermal study — engineer, not delivered
7	Summer comfort indicator	**Missing**	Thermal study — engineer, not delivered
8	Embodied carbon of components	**Missing**	Thermal study — engineer, not delivered
9	Carbon impact of energy	**Missing**	Thermal study — engineer, not delivered
10	Heat generation system selected	**Not settled**	**Design decision**
11	Thermal bridging at wall base	**Not settled**	**Design decision**

> **Rows 10 and 11 are not missing figures.** They are decisions not taken. Distinguishing them from the previous five avoids chasing an engineer over a question that is not theirs.

The seven boxes, as they appear in the notice

Bioclimatic demand: [awaiting the thermal study — ordered 21/05/2026, chased 18/06 and 09/07]

Heat generation system: [design decision not settled — for the design team to determine]

The other five boxes take the same form. Each names what is missing and who holds it — which is what allows anyone, on filing day, to tell in ten seconds whether the notice can go.

Why a default value is not a holding measure

Two of the five missing figures drive the result of the study. Filling them at random does not produce an approximate notice: it produces a notice whose conclusion no longer relates to the building. And once filed, the value is no longer an assumption — it is a figure declared by the design team, under its responsibility.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
