Fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for demonstration. **An old document is not a wrong document** — a procedure stable for seven years is a good procedure.

Rank	Last modified	Answers underpinned this month
1	**2019**	**340**
2	2025	**218**
3	2024	**171**
4	2026	**144**
5	**Undated**	**121**

> **The base's most consulted document is also its oldest.** That is not an anomaly: the most useful documents describe what does not change — and nobody thinks to

> reread them for that very reason.

What the agent does, and always has

Action	Done?
Cite the document	**Yes, on every answer**
Cite its modification date	**Yes, on every answer**
Stop using it	**No**
Demote it	**No**

What is proposed

Reread criterion	Today	Proposed
By age	**No rule**	**No**
By answers underpinned	**No rule**	**Yes — annual reread above a threshold**

A document read 340 times a month deserves an annual reread; one read twice deserves none. Today the base does the reverse — that is, nothing in either case.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
