Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **A knowledge base is queried when you do not know** — an employee who thinks their questions are tracked asks a colleague, or guesses.

Item	Kept?	Why
Question reworded without what identifies it	Yes	Writing the writing plan
Document served and its date	Yes	Retracing the path
Answer found or not	Yes	Measuring the gaps
Contradictions spotted	Yes	Getting them settled
Who asked which question	Impossible	The awkward questions would stop
History per person	Impossible	Same

Item	Kept?	Why
Count per department	Impossible	It reads as a judgement on the department
Profile of subjects consulted	Impossible	It is knowing what somebody does not know

This month's 380 unanswered questions would never have been asked, and the writing plan would not exist. Not keeping is not a precaution: it is what produces the data.

What the monthly summary contains

Content	What it indicates
Contradictions	An unsettled question
Subjects with no answer	What remains to be written
Heavily used old documents	What to reread first
Documents with no author	Nobody to tell

To be set by the company

Retention period for reworded questions: ____ months

Retention period for the served-documents log: ____ months

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
