

Two hundred and fourteen never served, twelve carry 61%

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

12 months · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **The agent suggests no deletion** — a document never served may cover a rare and serious case.

Situation	Documents	Share of the base
Carrying 61% of answers	12	0.8%
Served at least once	1,266	86%
Never served in 12 months	214	14%
Total	1,480	100%

What a never-served document may be

Possible nature	Must stay?
Incident procedure	Yes — and be dated

Possible nature	Must stay?
Annual obligation	Yes
A case arising every three years	Yes
An out-of-date document	A decision, not a tidy-up

Those are exactly the documents nobody consults and that are needed one day. An automatic sort by frequency would delete all four.

What the agent does in no case

Action	Done?	Why
Remove a document	No	Irreversible
Demote it in answers	No	It becomes invisible with no decision
Propose a deletion list	No	A deletion proposal gets approved without being read

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
