Forty-one documents with no author

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example
This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **They work perfectly until the day they become wrong** — and on that day, there is nobody to tell.

Indicator	Value
Documents with no author recorded	**41**
Answers underpinned this month	**612**
Carried by the first eight	**400**

Starting with the first eight settles two thirds of the subject. It is the only ranking the agent proposes: by what the document underpins, not by its age.

What the agent refuses to infer

Clue	Used to guess the author?	Why

The document's style	**No**	**An inference is not information**
The department concerned	**No**	**The subject is not the author**
Who uploaded the file	**No**	**Whoever uploads is not whoever answers**

What is proposed

Field	Exists today?	Same person as the author?
Author	**Sometimes**	—
Uploader	**Yes**	**No, in 9 cases of 10**
Who answers for this document	**No**	**It is the one the agent needs**

The missing field is neither author nor uploader: it is the person to ask when the document stops being true.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
