

Online procedures — abandonment down from 31 % to 7 %

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

4,100 walkthroughs, 6 online services · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **The resident enters their own credentials and validates their own procedure — it is that action which makes the procedure theirs, therefore valid, and which means it can never be held against them. The agent prepares everything that comes before.**

An online service is a procedure residents complete themselves on the web. Non-take-up is the entitlement a person holds and does not obtain, for want of having reached the end of the procedure.

Where abandonment happens — measured on the resident-parking online service

Screen	Share of abandonments	Measured cause
--------	-----------------------	----------------

Proof of address	47 %	The document is not to hand at the moment of filling in
Vehicle registration	31 %	Same cause
Account creation	14 %	Credentials forgotten
Payment	8 %	Procedure resumed later
Total abandonments	31 % of residents	78 % of abandonments come from a missing document, not from a badly built screen

The abandonment is not technical: the person starts, a document is missing, they close the page and never come back. **Giving the document list before the first screen removes the cause, not the symptom** — and that is half the abandonments dealt with without a single line of code moving.

What the agent does across the six online services

Stage	What the agent brings	What the resident does
Before the first screen	The full list of documents to prepare, with how to obtain each one	They gather their documents
During filling in	Screen-by-screen guidance, reading out what is asked and why	They follow and understand
On the personal account	Pre-filling in front of the resident from the documents brought — civil status, address, file numbers	They enter their credentials and they validate
Before validation	The missing document is flagged	They complete it before sending
Afterwards	A summary of what was filed and of what remains to be done	They leave with a written record

The measured result

Measure	Before	After	Reading
Abandonment of the resident-parking online service	31 %	7 %	The remaining 7 % were waiting on a document issued by another body
Help with filling in	12 minutes — 40 % of the walkthrough's time	4 minutes 12 — 14 %	533 hours returned to the service across 4,100 walkthroughs
Walkthroughs carried through to the end	2,829 out of 4,100	3,813 out of 4,100	984 more residents obtain their entitlement

984 procedures carried through are 984 residents who will not come back to the counter for the same thing — and as much officer time going back to those whose situation genuinely needs an officer. **The six document lists are written and ready to post at the head of each online service.**

For the town to settle

Order of publication of the 6 document lists on the website: _____

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
