Matched against the decisions published by the town · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **The 3 updated versions are written**, each aligned with the decision in force, **with the replaced line and the line that replaces it side by side. The head of service reads them, corrects with a word and settles the version — and it is that approval which makes the sheet stand up before a resident who challenges it.**

The 3 sheets older than the decision that amends them

Sheet	What no longer matches	Decision it relies on	Answers concerned last year
Identity documents — filing and collection	**Floor and office of the documents service, after an internal move**	**Published organisational note**	**1,720**
Resident parking	**Annual rate of the permit, revised**	**Town decision on rates**	**1,090**

Sheet	What no longer matches	Decision it relies on	Answers concerned last year
Summer opening hours of the town hall	Closing brought forward by half an hour	Published organisational note	430
Total	—	—	**3,240 answers drawn from a sheet to be revised**

These 3 discrepancies existed before the agent. They only show when the sheet and the decision that amends it are placed side by side — **and nobody had the time to do it, because that work only shows when it has not been done. Matching the 62 sheets now takes one night, and it starts again every night.**

What each rewritten version carries

Element	Content	What stays with the town
Replaced line and replacing line	**Side by side, on the same page**	**Reading it takes thirty seconds**
Governing decision	Its title and its date	A check at a glance
Volume concerned	**The number of answers the sheet fed over twelve months**	**The order of revision is decided on figures**
Easy-read version, dated like the plain one	**Written from the updated version**	**Nothing to rewrite a second time**
Go-live	—	**The head of service's approval — it takes a word**

The three topics to open first, and why those

Topic	Enquiries a year	Share of the recurring flow	Reading time
Identity documents	**5,200**	19 %	7 minutes
School and after-school enrolment	3,900	14 %	7 minutes
Resident parking	2,800	10 %	6 minutes
Total	**11,900**	**43 % of the recurring flow**	**20 minutes**

Opening all fifteen topics at once would take 100 minutes of reading and push the go-live back three weeks. **Three topics, twenty minutes, 43 % of the flow: it is the best ratio available**, and the other twelve follow at four a week — **the whole set is live within a month, and the first gain lands the next day.**

The action that stops it happening again

When	What the agent does	What comes back to the town
Every night	**It matches the 62 sheets against the published decisions and rewrites any sheet a decision amends**	**Five minutes of approval per decision**
At the same hour	**A sheet the town takes off the website leaves its answers**	**Nothing — withdrawal is enough**
On request	**It quantifies what the updated version would have changed over the past twelve months, answer by answer**	Go-live, approved with a word

> **It is this action that took substantive corrections from 3.4 % to 0.6 % from one quarter to the next. The 62 sheets stop ageing in silence, and the read-through will never again have to be done in one block.**
