

Direct correction — 1,100 of 1,840

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

4,210 records · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **The previous value is kept and restorable: that is what makes direct correction acceptable.**

The 1,840 pending observations, by nature

Nature of the data	Count	Checkable against a public source?	Direct correction openable?
Postcode / town	520	Yes	Yes
Legal form	310	Yes	Yes
Registration number	270	Yes	Yes
Opportunity amount	380	No	No — margin observation
Close date	210	No	No — margin observation

Nature of the data	Count	Checkable against a public source?	Direct correction openable?
Contact become unreachable	150	No	No — margin observation

On the three checkable categories, **the correction's error rate is nil by construction**: either the public source confirms, or the agent touches nothing.

Effect of opening it

Situation	Handling time
Today — margin observation, awaiting review	A review that never happens
Direct correction opened on the 1,100	Overnight

What stays in the margin, and why

Anything needing judgement. **Correcting would assume the agent knows what it does not** — an opportunity's real amount is checkable against no source.

For the company to settle

Categories open to direct correction: _____

Period during which a correction stays restorable: _____ days

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
