Technical framework — where jobseeker data lives

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Local inference, role-based access, processing in the EU targeted · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. **It describes the architecture actually proposed**: an employment service handles career histories, family circumstances, sometimes social or health information.

The two deployment modes, at the service's choice

Mode	Where the computing happens	What leaves the network	For whom
Local inference	**On a machine in the service**	**Nothing**	Organisations that already host their servers
Isolated resource	On a dedicated server hosted in France	**Nothing outside the European Union**	Organisations that would rather not run a machine

What protects jobseeker data

Point	Implementation	What it lets you answer a jobseeker
Training	**No jobseeker data feeds a public model**	“Your history serves your support only”
Technical account rights	**Read-only — the account the agent reads through has no right to write**	**“This is verified with one command”**
Encryption	In transit and at rest	“A stolen file stays unreadable”
Role-based access	**6 roles for 78 staff**: an employer liaison officer sees skills and availability, never social circumstances or health information	“Only the people concerned see your file”
Logging	Who consulted which file, when, and what the system produced	“Every consultation is traced”
Hosting	**France, under French law**, architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity	“Your data is processed within the European Union in the architecture chosen”

The year's measurements

Indicator	Year
Jobseeker data out of the service's network	**0** across 31,000 interviews
Transfers outside the European Union	**0**
Out-of-role accesses in the log	**0**
Guidance, referrals or grants decided without an adviser	**0**

What the agent plugs into — with no migration

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Tool already in place	What the agent does there	What changes for staff
Employment information system	**Reads files and interview records**	Nothing: no writing, no change of screen
Local vacancy database	Sets vacancies against pathways, criteria displayed	**The match stays the adviser's**
Document management system	**Indexes the content of filed documents**	**No renaming, no moving**
Messaging service	Appointment and deadline reminders, within the cap set	**Cap and time window set by the service**

Reversibility, verifiable before the vote

Item	The day the service stops
The agent's indexes	**Deleted — they contained no file**
Support files	**Unchanged**: same files, same rights
Log of consultations and outputs	Handed over in an open format, **or destroyed — the service chooses at go-live**
21 rewritten sheets, 12 answers and their easy-read versions	**Stay with the service, readable without us**
Migration	**None on the way in, therefore none on the way out**

> **A dry-run exit is proposed at the end of the first quarter**: half a day, we switch off, we check that the service receives exactly as before, we switch back on.

For the service to settle

Deployment mode chosen (local inference / isolated resource): _____

---

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
