> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. **Three automatic acts, not one more, each withdrawable with one word.** Everything else waits for a request.

The three automatic acts

Act	When	Reversibility
Regeneration of the career summary	**With every document filed**	**A removed document disappears from the indexes at the same hour**
Matching of new vacancies against the 9,400 pathways	**Every night**	**Handed to each adviser for their caseload, criteria displayed**
Appointment reminder	The day before	**Within the cap of 3 messages a month set by the service**

The four decisions that stay with the adviser

Decision	What the agent prepares	What the signature brings
Settling a diagnosis	Elements gathered, sourced, ordered	**An analysis owned, dated and discussable with the person**
Directing	Applicable schemes, conditions ticked	Same
Referring to training	Places, lead times, funding checked	Same
Awarding a grant	Conditions ticked, documents checked, amount calculated	Same

A decision with effects on a person never rests on automated processing alone. It is taken by the adviser — **and guidance nobody had signed could be argued with by nobody, whereas a jobseeker is entitled to argue with what they are offered.**

The exit, verifiable before the vote

Item	The day the service stops
The agent's indexes	**Deleted — no file inside**
Log	Handed over in an open format **or destroyed, at the service's choice**
21 rewritten sheets, 12 answers, easy-read versions reviewed	**Stay with the service**
Dry-run exit	**Half a day at the end of the first quarter — first Friday of August, 41 interviews against 140 on average**

For the service to settle

Date of the dry-run exit: _____
