Technical framework — where members' career records live

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114
Document issued on 09/11/2026

Local inference, role-based access, processing in the EU targeted · fictional document

Fictional document — demonstration example
This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **A pension fund holds the career, income and family situation of a whole lifetime**, for 308,000 people. *Local inference means the model computes on the organisation's machine: a member's name and career periods cross no outside network to be processed.*

The two possible architectures

Architecture	Where the computation happens	What leaves the organisation	For which fund
Local inference	**On a machine belonging to the fund**	**Nothing**	A fund with a server room

Architecture	Where the computation happens	What leaves the organisation	For which fund
Isolated resource hosted in France	In France, under French law	**Nothing outside the European Union**	**A fund without a server room — no pooling with another organisation**

The absence of pooling is the condition supervisory authorities look at first. An environment dedicated to each organisation guarantees that no member's data sits alongside another fund's, including in memory.

The protections, one by one

Protection	What it covers	What it prevents
No model training	Records, documents, letters, estimates	**That what is learnt from a member resurfaces elsewhere**
Encryption in transit and at rest	Every flow, every store	Reading outside the intended access
Strong authentication	The 74 staff of the pensions department	Use of an account by a third party
Role-based access	**Rights follow the job**	**That a reception officer sees income figures when all they need is a progress status**
Logging	Who consulted what, when, and what was approved	That a consultation leaves no trace
Hosting in France, under French law	All member data	**Exposure to the Cloud Act and FISA 702 left unexamined**

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Protection	What it covers	What it prevents
SecNumCloud and health-data hosting options	The most sensitive scopes	Shared infrastructure on those scopes

Role matrix, as configured

Role	Sees	Does not see
Telephone reception officer	**How far a file has progressed, the documents expected**	**Recorded income, estimates**
Career-record officer	The periods of the files in their portfolio	Files outside the portfolio
Pensions adviser	The full file of the members they handle	Another adviser's files, except on a traced transfer
Regulatory specialist	**Everything**	—
Data protection officer	The access logs and the processing record	The content of the files

What the log makes possible — data-rights requests

Measure	Before	After
Requests received per year	**62**	62
Time to handle one request	**Half a day of officer time, across five systems**	**20 minutes**
Completeness of the answer	Depended on the memory of whoever searched	**An index of every place the person appears**

Legal notice (in French): bluelemonagent.ai/mentions-legales

An obligation endured becomes an obligation met, and the processing record the data protection officer presents each year keeps itself up to date — sources, retention periods, who accesses what.

The offer benchmarks

Benchmark	Value
Hosting in France, under French law	**100%**
Data outside the European Union	**0**
Uses ready to deploy for this role	**7**
Decisions with a legal or significant effect taken by an agent	**0**
Software to be replaced	0

Architecture chosen by the fund: _____ · Approved by: _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
