> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document** as to the organisation and the figures, produced for the demonstration. **The legal rules quoted are real and carry their source and date.**

What the year produced

Measure across 640 files	Volume	Share
Files supported	**640**	100 %
Sent back at least once for a missing document	**128**	**20 %**
ACRE application window lapsed	**41**	**6 %**
Average time, first meeting → registration	11 weeks	—
of which files with a missing document	**16 weeks**	**+ 5 weeks**

The documents that send a file backwards

Document	Number of returns	When it was requested
Certificate of filiation	**61**	**At filing**
Sworn declaration of non-conviction, unsigned	27	At filing
Expired identity document	22	At filing
Proof of right to occupy the premises	18	At the 2nd meeting

> **Three of the four documents were only requested at filing.** Yet the single window blocks the declaration until every required document is supplied: a document requested too late costs a full round trip.

The 41 lapsed ACRE windows, and where they cluster

When the start of activity was declared	Files	Window lapsed
Between two meetings, out of the adviser's sight	**217**	**34**
During a meeting	289	4
After the last support meeting	134	3

The reading: the 60-day clock starts at the **declared start-of-activity date**, not at a meeting. When that declaration happens between two meetings, the support calendar and the legal one fall out of step — and nobody notices before the 61st day.

The proposed calendar

Step	What is recorded	What it triggers
1st meeting	**Intended start-of-activity date**	**Calculation of the 60-day cut-off**
D−45	—	Reminder to the adviser
