Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **Indexing works on the CONTENT of files, not on their names.** The template being sought was called *AUB_cata_PRT_ok_final_v3.indd* and carried neither the season, nor the year, nor its version number.

The state of the image library

Finding	Volume	Consequence

Hours of “looking for a file” in the quarter	28 h	More than three studio days for five people, per the activity records

What is proposed: a monthly pass over recent uploads to set the brand, the campaign, the season and the version. **Indexing renames nothing and moves nothing:** existing paths keep working, and the studio can stop the monthly pass without losing the index already built.
