Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **No risk level, no colour, no ranking.** An officer who sees "high risk" assesses differently, and they should not assess differently before having looked.

The four items shown

#	Item	Example
1	**The criterion's sentence**	"Proof of address more than 3 months before filing"
2	**The values read, with their source**	Proof dated: 03/03/2026 (rent receipt, p. 1) · Filed: 18/06/2026
3	**The calculation**	Gap: 107 days
4	**The date and the criterion**	Flagged 18/06/2026 · criterion 1

What is not shown, and why

Item omitted	Reason
Risk level	**Steers the assessment before the examination**
Numeric score	**Reads as a judgement about the person**
Colour	Same effect as a level, less explicit
Ranking of the file	Introduces a comparison between residents
History of the file's flags	**Builds a reputation**

What the officer can do

Action	Effect
Open the two cited documents side by side	Checked in ten seconds
Mark the flag as cleared	**It disappears, leaving no trace on the file**
Confirm the flag	The file follows the service's control procedure
Report that the criterion is badly worded	Goes to the owner, by criterion

> **The second row is the most expensive to hold to technically, and it is the most important rule of the system.** A cleared flag leaves nothing.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.
