Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **No flag is cleared by the agent**. The sorting makes clearing them a morning's work; the act belongs to the officers.

Category	Count	Possible handling	Need to open the file?
From the runaway criterion	19	Cleared as a block once the cause is confirmed	No
On already closed files	7	Cleared, the flag arrived after the decision	No
Open and unexamined	5	Examination	Yes

26 of the 31 can be handled without opening a file. The five that remain are the ones that deserved a look — and two have waited more than sixty days.

The five remaining

Age	Originating criterion	File state	Consequence
68 days	Inconsistent income	Assessment suspended	A resident is waiting for a decision
61 days	Household composition gap	Assessment suspended	A resident is waiting for a decision
34 days	Same bank details	In progress	—
21 days	Document dated after filing	In progress	—
12 days	Amount above the ceiling	In progress	—

Two residents are waiting for a decision that is waiting for a flag nobody is looking at. That is the least visible cost of a detection system: it is not measured in false positives, it is measured in stalled assessments.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
