Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **The question is not theoretical:** three inward investment projects are under way subject to confidentiality agreements, one of them a direct competitor of a business already established in the area. **Leaking that one name would cost the project and the relationship with the established business.**

The two deployment modes

Mode	Where computation happens	What leaves the network	For whom
Local inference	**On a machine belonging to the authority**	**Nothing**	Authorities with their own server room

Mode	Where computation happens	What leaves the network	For whom
Resource isolated per authority	On a dedicated server hosted in France	**Nothing outside the European Union**	**No pooling with another authority**

What protects the files

Point	Implementation	What the authority can state
Training	**No business data trains a model**	“What is learned here stays here”
Role-based access	**Rights follow the function: the assistant opens territory factsheets, not projects under confidentiality**	“Only the people concerned open your file”
Encryption	In transit and at rest	“Intercepted data stays unreadable”
Logging	Complete, consultations included	“We produce a dated record”
Hosting	**France, under French law, architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity**	“Your data is processed within the European Union in the architecture chosen”
Passing data to a third party	**Never, without a written decision of the authority**	“Your project is disclosed to nobody”

The year's measures

Data leaving the European Union	**0**
Project information passed to a third party	**0**
Grants awarded without a resolution	**0**
Plots reserved without the land department	**0**

> **This document is also what the region will ask for when the agreement comes up for renewal** — processing operations, retention periods, access by role. It usually takes three weeks to rebuild; here it is kept up to date continuously.

For the authority to settle

Deployment mode chosen (local inference / isolated resource): _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
